Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6-10, 13-17, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Griffiths (U.S. 4,802,243). Griffiths discloses the invention as claimed. Griffiths teaches an eye and ear protection apparatus which comprises an eye protective portion 24, and an ear protective portion in the form of a pair of opposing ear covering or ear muff members 18, means for attaching the eye protective portion to the ear covering members, and means for variably adjusting the position of the eye protective portion relative to the ear covering members, whereby the ear protective portion is functionally adapted to cover and protect a user's ears and the eye protective portion is functionally adapted to cover and protect a user's eyes. The eye protective portion 24 is a single piece of optically clear, visually transparent, resilient material and includes a frontal portion and at least one peripheral portion disposed distally symmetrically to each side of the frontal portion and being integrally formed with the frontal portion, such that the wearer's peripheral vision is not obstructed. The distally disposed peripheral portions including a slot 30 defined therewithin. An attachment and adjustment means comprising a flanged extension member 16 extends outwardly from each ear covering member, with the extension member being receivable within the slot

Art Unit: 3765

30 of the distally disposed peripheral portion, such that the eye protective portion is movable from a "down" position in which the eye portion protects the user's eyes, and an "up" position where the eye portion is away from, and not in front of, the user's eye area.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4, 5, 11, 12, 18, 19, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Griffiths '243 in view of Robrahn et al. (Robrahn, U.S. 6,138,286). Griffiths discloses the invention substantially as claimed. However, Griffiths doesn't teach an eye protective member in the form of a single piece of optically clear polycarbonate resin including a color tint or a light filtering capacity. Robrahn teaches a lens 24 formed from polycarbonate resin and also including a light filtering capacity. Polycarbonate material is known for its elastic and memory properties, as well as for a high resistance to impact. The lens tint as disclosed in column 5 absorbs ultraviolet radiation and reduces the transmission of visible light to the eyes on bright sunny days. Therefore, it would have been known to one of ordinary skill in the art to modify Griffiths lens to form the lens from a polycarbonate resin with light filtering capacity in order to provide improved protection and wearing performance to the wearer.

Conclusion

5. The prior art made of record on the attached PTO-892, and not relied upon, is considered pertinent to applicant's disclosure.
